DETAILED ACTION

Priority

1. Applicant's claim of priority to application 10010387 filed 12/7/01 is acknowledged.

Drawings

2. The drawings are acceptable.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States
- (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

4. Claim(s) 1-6 is/are rejected under 35 U.S.C. 102(e) as being anticipated by Haitin et al. which discloses all the claimed elements including:

(Re: cl 1,3, 4, 6) A memory device carrying a set of instructions (ward computer with memory 22) which, when executed, perform a method comprising:
receiving user information (c10 L 32-38);
unlocking certain doors of a dispensing cabinet in response to said user information (c10 L 40-51);
receiving mode information identifying a locate mode (c6 L 62-c7 L 7);
receiving information identifying an item to be located (c3 L 3-13);
flashing a display positioned on a shelf within the cabinet with the number of items held by that shelf which are to be located (c 11 L 1-2 ; c10 L 47-51);
receiving a log off instruction and locking the unlocked doors (c8:L 33-38)
(Re: cl 3,6) displaying the number of items taken on the display (c10 L 40-46);
(Re: cl 2, 5) receiving patient information (c11 L 22-30).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim(s) 1-6 is/are rejected under 35 U.S.C. 103(a) as being unpatentable over

Arnold which discloses:

(Re: cl 1,3, 4, 6) which, when executed, processor performing a method comprising:
receiving user information (c7 L 54-64);
unlocking certain doors of a dispensing cabinet in response to said user information (c7 L 54-64);
receiving mode information identifying a locate mode (c7 L 54-64);
receiving information identifying an item to be located (c7 L 54-64);
flashing a display positioned on a shelf within the cabinet with the number of items held by that shelf which are to be located (c7 L 54-64);
receiving a log off instruction (c8 L 6-23);
and locking the unlocked doors (c7 L 30-56);
(Re: cl 3,6) displaying the number of items taken on the display (c7 L 54-64)
(Re: cl 2, 5) receiving patient information(c7 L 54-64).

Arnold discloses the method is performed under control of a processor control processor (c4 l 55-c5 L 11). The examiner takes official notice that methods are regularly stored in computer magnetic and ROM memory. It would have been obvious to place the method steps performed by the processor in computer nonvolatile memory to have the computer access the steps upon power up, and facilitate transfer of the steps to machines at remote locations and come up with the invention as claimed.
